## **INDEPENDENT AUDITORS' REPORT**

**To the Board of Directors of Titan Reinsurance Ltd.**

### **Opinions**

We have audited the condensed financial statements of Titan Reinsurance Ltd. (the "Company"), which comprise the condensed balance sheets and condensed statements of capital and surplus as of December 31, 2023 and 2022, and the related condensed statements of income for the years then ended, and the related notes to the condensed financial statements.

#### **Unmodified opinion on regulatory basis of accounting**

In our opinion, the accompanying condensed financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations for the years then ended in accordance with the financial reporting provisions of the Insurance Act 1978, amendments thereto and the Insurance Account Rules 2016 with respect to condensed general purpose financial statements (the "Legislation").

#### **Adverse opinion on U.S. generally accepted accounting principles**

In our opinion, because of the significance of the matter discussed in the *Basis for adverse opinion on U.S. generally accepted accounting principles* section of our report, the condensed financial statements do not present fairly, in accordance with U.S. generally accepted accounting principles, the financial position of the Company as of December 31, 2023 and 2022, or the results of its operations for the years then ended.

#### **Basis for opinions**

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (U.S. GAAS). Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the condensed financial statements* section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### **Basis for adverse opinion on U.S. generally accepted accounting principles**

As described in Note 3 to the condensed financial statements, the condensed financial statements are prepared by the Company on the basis of the financial reporting provisions of the Legislation, which is a basis of accounting other than U.S. generally accepted accounting principles, to meet the requirements of the Bermuda Monetary Authority.

The effects on the condensed financial statements of the variances between the regulatory basis of accounting described in Note 3 and accounting principles generally accepted in the United States of America, although not reasonably determinable, are presumed to be material and pervasive.

## **Responsibilities of management for the condensed financial statements**

Management is responsible for the preparation and fair presentation of the condensed financial statements in accordance with the financial reporting provisions of the Legislation. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the condensed financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the condensed financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date the condensed financial statements are available to be issued.

## **Auditors' responsibilities for the audit of the condensed financial statements**

Our objectives are to obtain reasonable assurance about whether the condensed financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with U.S. GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgement made by a reasonable user based on the condensed financial statements.

In performing an audit in accordance with U.S. GAAS, we:

- Exercise professional judgement and maintain professional scepticism throughout the audit.
- Identify and assess the risks of material misstatement of the condensed financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the condensed financial statements.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the condensed financial statements.
- Conclude whether, in our judgement, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

## Schedule X

### NOTES TO CONDENSED GENERAL PURPOSE FINANCIAL STATEMENTS

#### Matters to be set forth in a General Note to the Financial Statements

1. Titan Reinsurance Ltd. (formerly Crown Global Titan Life Insurance Ltd.) (the “Insurer”) was incorporated under the laws of Bermuda on October 22, 1996. On May 23, 2017, the Company had a change in control event whereby the Company’s existing Parent, Crown Global Holdings Ltd. (“CGIH”), reduced its holding in the Company from 100% to 19.9%. On June 18, 2020, the majority shares were transferred to Titan Global Foundation, as a result of the transaction, Titan Global Foundation now owns majority of the Company’s shares, with a holding percentage of 80.1%. The Company is licensed as a “Class C” long term insurer.
2. The Insurer underwrites, sells and reinsures variable life and annuity insurance policies.
3. These condensed general purpose financial statements are prepared in accordance with financial reporting provisions of the Insurance Act 1978, amendments thereto and the Insurance Accounts Rules 2016 with respect to condensed general purpose financial statements (the “Legislation”). The recognition and measurement principles applied are in line with accounting principles generally accepted in the United States of America (“US GAAP”). The presentation of these financial statements in accordance with the guidance prescribed under the legislation differs from US GAAP in certain respects as follows:
  - a. The format of the financial statements is prescribed by schedules IX and X of the Insurance Accounts Rules 2016.
  - b. Statement of Cash Flows or equivalent is not included; and
  - c. Certain disclosures required by US GAAP are not included
  - d. Comprehensive income and its components are not presented in the condensed statement of income.
  - e. Life benefit reserves are to be reported net of reinsured amounts.

The effects of the foregoing variances from US GAAP on the accompanying condensed general purpose financial statements have not been determined, but are presumed to be material.

4. The accounting policies of the insurer are detailed as follows:

#### Cash and time deposits

Cash and time deposits include fixed deposits with original maturities, when purchased, of three months or less. Cash and time deposits are recorded at face value, which approximate fair value.

#### Separate account assets and liabilities

Separate account assets represent funds for which investment income and investment gains and losses accrue directly to the policyholders. Each account has specific investment objectives and the assets are carried at market value. The assets of each account are legally separated and are not subject to claims which arise from any other business of the Company. Separate account assets are invested in accordance with the terms of the underlying policy agreements and are available only to settle the corresponding separate account liability. The policy agreements indicate that the total value of the assets held in each fund will equal the company’s liability at any time.

#### Commissions

Commissions and other costs of acquiring new life and annuity business are charged to the Condensed Statement of Income as incurred.

## Benefits and losses

Changes in policy reserves have been expensed and included in line 26(a) of the Condensed Statement of Income.

## Policy Reserves

The Insurer has classified its variable annuities and variable universal life insurance as universal life-type contracts. The liability for universal life-type contracts is equal to the balance that accrues to the benefit of the policyholders as of the financial statement date (commonly referred to as the account value), including, policyholders' accumulated net deposits plus interest credited and investment performance less policyholder withdrawals, asset fees, and policy charges.

Liabilities for the Insurer's life insurance contracts include amounts for unpaid losses and future policy benefits. The unpaid losses include estimates of amounts to fully settle known reported claims as well as claims related to insured events that the Insurer estimates have been incurred but have not yet been reported. The future policy benefits are calculated using mortality assumptions deemed appropriate at the time of valuation. The methods used in determining the liability for unpaid losses and future policy benefits are standard actuarial methods.

Separate account assets and liabilities occur as part of variable annuity and variable universal life contracts and represent policyholders' funds, which have been segregated into accounts with specific investment objectives. Separate account assets are recorded at fair value based on net asset values provided by investment managers, fund houses and hedge funds. The investment income and gains or losses of these accounts accrue directly to the policyholders. The activity of the separate accounts is not reflected in the Condensed statement of income except for (1) the fees the Insurer receives, which are assessed on a daily, monthly or quarterly basis and recognized as revenue when assessed and earned, and (2) the activity related to death benefits paid on variable universal life policies.

The assets of each account are legally segregated under the authority of The Titan Life & Annuity (Bermuda) Ltd. Consolidation and Amendment Act 2003 and are not available to claims that arise out of any other business of the Insurer.

## Reinsurance assumed

The Company has underwritten some policies whereby the net retention is \$50,000 per policy. The remaining amount of the risk is covered by way of policies purchased on lives of the same underlying individuals from 3rd party primary insurance carriers. Policy documentation executed by the Company entails that the Company has no liability to the ceding entity until the time it makes a recovery from the primary insurance carrier. As of December 31, 2023, the gross amount and net amounts of risk were \$690,365,748 and \$374,840 respectively.

## Reinsurance ceded

The Insurer has reinsurance contracts in force to cover excess of retention mortality risk on life insurance policies. The reinsurance premiums are included in line 13 of the Condensed Statement of Income.

Reinsurance recoveries are shown as part of Increase/Decrease in Policy reserves section of the Condensed Statement of Income.

Assets related to external reinsurance contracts for actual claims raised are reported in the Condensed Balance Sheet in Line 11 Reinsurance Balances Receivable.

Reinsurance contracts do not relieve the Company from its obligations to policyholders. Failure of reinsurers to honor their obligations could result in losses to the Company; consequently, allowances are established for amounts deemed uncollectible. The Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions,

activities, or economic characteristics of the reinsurers to minimize its exposure to significant losses from reinsurer insolvencies.

The Company has purchased reinsurance cover on its book of Universal Variable Life (“UVL”) policies. The amount of risk retained varies per policy. As of December 31, 2023, and for the in-force UVL policies, the gross amount and net amounts of risk were \$14,611,748 and \$24,840 respectively.

Premiums payable related to ceded reinsurance premium are reported in the Condensed Balance Sheet in Line 28 Insurance and reinsurance balances payable.

#### Push down accounting

In accordance with the guidance per ASC 805-50-599-1, the Company has applied the "push down" method of accounting for the purpose of preparing these financial statements on the basis that the Company's former ultimate parent (NFS) purchased 100% of the Company's stock. Under the "push down" method of accounting, the values of the assets and liabilities of the Company that were established as a consequence of the purchase transaction that resulted in the Company becoming wholly-owned by NFS, become the basis of accounting for assets and liabilities reflected in the Company's financial statements including intangible assets and goodwill (if any) that were previously not reflected in the Company's financial statements. As such, the value of business acquired (“VOBA”) asset, as discussed in Note 4 was included in the Company's balance sheet and all other assets and liabilities were revalued to fair value.

No change to the above accounting treatment, and the resulting VOBA balance, resulted from a change in the ultimate Parent for the Company in 2010 and 2020.

#### Value of business acquired

All assets and liabilities assumed upon acquisition of another entity are measured at fair value on the date of acquisition and have been “pushed down” to the Company as explained above.

The current value of future pre-tax profits to be earned on the business acquired is then actuarially evaluated and the resulting value is recorded as an identifiable intangible asset VOBA.

The VOBA asset related to universal life-type contracts are amortized in the same way, over the estimated life of the contracts acquired using the retrospective deposit method. Under the retrospective deposit method, acquisition costs are amortized in proportion to the present value of estimated gross profit (“EGP”).

The expected future cash flow used in determining such value are based on actuarially determined projections of best estimate policy charges, premiums, mortality, separate account performance, surrenders, change in reserves, operating expenses, investment income and other factors. These projections considered all known or expected factors at the valuation date based on the judgment of management. The actual experience on purchased business, to some extent, has and may continue to vary from projections due to differences in renewal premiums, investment spreads, investment gains and losses, mortality costs, policyholder behaviour, or other factors.

The Company estimates gross profits over a time horizon such that estimated profits emerging subsequent to that time frame are believed to be immaterial. Actual gross profits, in a given reporting period, that vary from management's initial estimates result in increases or decreases in the rate of amortization, referred to as “retrospective unlocking”, which are recorded in the current period.

The Company completes a comprehensive assumptions study and refines its estimate of future gross profits during each year end. Upon completion of an assumption study, the Company revises its assumptions to reflect its current best estimate, thereby changing its estimate of projected account values and the related EGPs in the VOBA model. The VOBA asset is adjusted to reflect such changes in the period of the revision, a process referred to as “prospective unlocking”. Changes in assumptions can have a significant impact on the amount of VOBA reported for all products and their related amortization patterns. In general, increases in the estimated separate account returns result in increased expected future profitability and may lower the rate of VOBA amortization, while increases

in lapse/surrender and mortality assumptions reduce the expected future profitability of the underlying business and may increase the rate of VOBA amortization.

The Company annually evaluates the recoverability and loss recognition of VOBA. Recoverability testing relates to the business issued during the year and loss recognition testing applies to the in force business. If either evaluation indicates that the existing insurance liabilities, together with the present value of future net cash flows from the blocks of business acquired, is insufficient to recover VOBA, the difference, if any, is charged to expense as accelerated amortization of VOBA.

The use of risk-adjusted discount rates was necessary to establish the initial fair values of VOBA. In selecting the appropriate discount rates, management considered its weighted average cost of capital as well as the weighted average cost of capital required by market participants. In addition, consideration was given to the perceived risk of the assets acquired, which includes the expected growth and competitive profile of the life insurance market and the nature of the assumptions used in the valuation process.

#### Unearned and deferred reinsurance premiums

The Company has deferred premiums coming in from writing reinsurance (unearned premiums on Line 16 of the Condensed Balance Sheet) and for business that has been ceded out (deferred reinsurance premium asset on Line 13 (i) of the Condensed Balance Sheet). These represent amounts that have been both received and paid for either 3 months or 12 months, during the year.

#### Taxes

Under current Bermuda law the Company is not required to pay taxes in Bermuda on either income or capital gains. The Company has received an undertaking from the Minister of Finance in Bermuda that in the event of such taxes being imposed, the Company will be exempted from taxation until the year 2035.

The Bermuda Corporate Income Tax Act was enacted on December 27, 2023, establishing a 15% income tax regime. The Act is applicable to Bermuda business that are part of multinational enterprise (MNE) groups with annual revenue of EUR 750m or more. The tax is effective beginning in 2025. As of December 31, 2023, the Company is not within this revenue threshold and hence not an in-scope entity. Subsequent financial years will be assessed for these rules.

5. The basis of recognition of premium, investment and commission income.

#### Revenue recognition

Other insurance income includes fee income, policy charges and commission income. Fee income and policy charges for universal life-type contracts consist of asset fees, cost of insurance charges, administrative fees and surrender charges that have been earned and assessed against policyholder account balances during the period. The timing of revenue recognition as it relates to fees assessed is determined based on the nature of such fees. Asset fees, cost of insurance charges and administrative fees are assessed on a daily, monthly or quarterly basis and recognized as revenue when assessed and earned. Surrender charges are recognized upon surrender or partial surrender of a policy in accordance with contractual terms.

Fees generated as a result of setting up a new policy are included in income in the period the policy is setup as these are non-refundable and there are no future performance obligations associated with the fee.

#### Long term business investment income

Interest income is recognized on the accruals basis.

6. There is no translation of amounts denominated in currencies other than the currency of the condensed financial statements.
7. There are no foreign exchange control restrictions affecting the assets of the insurer.

8. The Company has no outstanding commitments or contingencies.
